CORE STRENGTHS

- 5+ years building production AI/ML systems spanning Generative AI, computer vision, and NLP
- Lead AI consulting engagements end-to-end, from business case to solution design
- Collaborated with CERN and global brands on Machine Learning research
- Bridge data science, software engineering, and cross-functional leadership

EDUCATION

M.Sc. in Data Science
Universidad de Sonora · 2020–2022

B.Sc. in Physics
Universidad de Sonora · 2016–2020

M.B.A.
Instituto Tecnológico de Hermosillo · 2012–2013

B.A. in Tourism & Business Administration
Universidad Estatal de Sonora · 2008–2011

LANGUAGES

English
Proficient — C1

Spanish
Native

PROFESSIONAL SUMMARY

AI Engineer and Data Scientist specializing in Generative AI, agentic systems, and Machine Learning. I take AI projects from research and proof of concept to production, combining technical expertise with business strategy. My background in physics, data science, and business enables me to design solutions, lead AI consulting projects, and develop data-driven business cases, delivering scalable, practical AI solutions that create real business value.

PROFESSIONAL SKILLS

Generative AI & Agents

Generative AI, Agentic AI, LangChain, LangGraph, LlamaIndex, RAG Systems, Prompt Engineering, Claude Code, OpenAI APIs

ML & Computer Vision

TensorFlow, PyTorch, Keras, Scikit-learn, Deep Learning, Computer Vision, NLP, OpenCV, AWS Rekognition, NeRFs, Gaussian Splatting

Data, MLOps & Cloud

Python, SQL, R, Pandas, NumPy, Power BI, Tableau, GCP (BigQuery, Cloud Run, Artifact Registry), AWS (SageMaker, Lambda), Docker, Terraform, Git, GitHub Actions

AI Strategy & Consulting

AI Architecture, AI Consulting, Business Case Analysis, Information Architecture, Technical Writing, Leadership & Collaboration

WORK HISTORY

AI Engineer – *Wizeline*

OCT 2024 – PRESENT

- Led R&D and delivery of an AI-powered content creation platform for highly-regulated industries, coordinating the MVP and architecting its product roadmap.
- Architected a LangChain SQL Agent and a Retrieval-Augmented Generation (RAG) system with intelligent query routing; led AI consulting engagements from business case analysis to solution design.

Data Scientist – *Wizeline*

APR 2023 – SEPT 2024

- Built an AI-based video-to-text pipeline for automated transcription and highlight generation, and a neural-network algorithm to estimate body measurements from 2D images.
- Benchmarked people-tracking techniques for sports video and designed a CNN-based autoencoder for anomaly detection on CERN's CMS systems.

Technical Writer – *Wizeline*

APR 2021 – APR 2023

- Established documentation strategies and Docs-as-Code workflows (Git, Markdown, MKDocs) to improve engineering team efficiency.
- Collaborated with cross-functional teams to produce technical reference materials and stakeholder presentations.

Accounting Analyst – *Evolve Media*

FEB 2012 – JUL 2016

- Managed accounts receivable and financial data reporting.

OTHER ACTIVITIES

Instructor, MLOps Bootcamp — *Wizeline Academy* 2024

Instructor, Technical Writing Academy — *Wizeline Academy* 2022

Research Assistant — *Biophysics & Semiconductors Laboratories* 2018 – 2020

Summer Research — *CubeSat Orientation Project, UABC* 2019
